There may be a fee applied to some workshops

What you will learn during AIM 2B Workshops

Using the basic skills a representative for the trade companies / or group will demonstrate at your School or Youth Centre how to advance in your selected interest. **It's almost like having a crash course!** But this isn't all. When the trade demonstration is over if you decide you want to learn more about the course they will provide assistance through mentorship to guide you every step of the way.

All this means a safer way to make good money and have a respectful and legal career that discourages carrying guns and knives for protection. The workshop programme gives you a unique insight into the mind of someone doing what you want to do in life and show you how to make the most of an enjoyable skill.

How the workshop programme works

Firstly, you enquire through your school after visiting our web forum with Workshop schedules to help you decide. Then you are guided on what days the workshop representative will be available at the designated venue. Some you join will offer **a live session** using a model that could be you! That means FREE hair cut or photography etc.

When you join AIM 2B Workshops, you will be amazed at the things you will learn, including:

- How to make initial contacts in the field
- How to gain the skills necessary for your selected career interest
- How to apply for temporary on site placement/ or course guidance
- How to make a profit and the reality earnings potential in this career
- How to gain the qualifications needed if any at all
- How to apply the skills in the market to make money
